

HYDREMA 912D MultiTip ADT

In addition to the Hydrema 912D we are pleased to offer the Hydrema 912D MultiTip for hire.

With its unique swivel skip facility, the 912D MultiTip offers a unique option for material distribution on sites in which there are space restrictions for manoeuvring. The skip can be tipped in the conventional manner to the rear as well as being able to tip to the side.

The 912D MultiTip has the same low ground pressure advantages as its rear tipping counterpart such as floatation tyres to minimise ground disturbance.

The Hydrema 912D has a fuel consumption of only 9 litres (2 gallons) per hour.

Hydrema 912Ds are ideal alternatives to 9 and 10 tonne forward tipping site dumpers offering improved visibility for Health & Safety compliance.

912D MultiTip

TECHNICAL DATA:

- Ground bearing pressure of only 17.5psi
- Fuel economy – 9 litres (2 gallons) per hour
- Carrying capacity of 12 tonnes
- Total Width 2200 mm
- Max height 2750 mm
- Overall length 5900 mm

We can offer both the 912D and 912D MultiTip either operated or self drive at competitive rates
